Nancy Dill Miller Student Instructor and Dror Schneider, Certified HANDLE Instructor

An Introduction to HANDLE

HANDLE, a Holistic Approach to Neurodevelopment and Learning Efficiency, addresses all ages (infant to senior) and many issues of behavior, as well as social, emotional and physical function. It is a gentle, non-drug based modality that takes advantage of neuroplasticity to help the body and brain work more efficiently together.

This course is for you if you are a parent, professional, caregiver or curious individual who seeks a better understanding of how behaviors can communicate about underlying neurological stressors.

Course Content

- **Begin to explore how irregularities in neurological and developmental systems relate to perplexing behaviors and dysfunction**
- **Begin to understand how different sensory systems impact one another**
- **The impact of the internal and external environments on stress and behaviors.**
- **Understanding how nutrition and good health enhance our abilities**
- **See yourself and others through non-judgmental eyes**
- **Recognize subtle signs of stress and intervene before the consequences manifest**
- **Learning tools and knowledge to apply in everyday situations**
